Just like his name his name implies, TC Total is the 'Total Package'. Certainly one of the most talked-about young bulls of Spring '05, this bull rose to the top of the TC bulls with an IMF scan ratio of 199, and along the way grew to an exciting 115 ratio for WW and 113 ratio for YW. His pedigree is built from a 'new-generation' tabulation that goes back to the dam of Dividend. Frame size on Total is right at 6.5--not too big and not too small. He never has a bad day--his phenotype is flawless, he consistently produces lots of high quality semen and he's gentle like a pup. Total carries on the 208 tradition with unmatched style and 'total' performance.

Redirect

7AN266

- #3 for REA and +53.15 for \$B
- Future Direction Son with Low BW and High Growth

Yearling Female, Leachman Cattle of Colorado, CO

If muscle is part of your game plan, then you need to consider Redirect. A Future Direction son, Redirect rose to the very top with his first crops' ultrasound data, ranking as the #3 bull in the breed for REA and generating a +53.15 for \$B. Along with really cool ultrasound data, he shines as a '0-90' bull (BW to YW). His foot and leg structure is as good as it gets with more heel and flexibility than most. Gentle, long-ribbed and moderate for size, Redirect will be heavily used where low birth weights, fast growth to yearling (top 10%) and major muscle are in demand.
