 Muscle ◆◆◆◆

*Premium Beef is proving his worth as one that can sire easily-born, thrifty calves that excel for body mass and volume. At weaning time, his calves are moderate-sized chunks with more base-width and depth than the average. He balances birth, growth and carcass merit with no extremes and is a customer-pleaser not only because he adds value, but people like the way these calves look. With his balance of low birth, solid growth and high figures for both IMF (top 3%) and REA (top 10%), Premium Beef programs his offspring to gain additional returns from calving time to harvest.*
