 TC Marcia 7105

Ideally, a Grid Maker son will be lower for BW and higher for IMF than his sire and not give up performance and muscle--and that's exactly where Beef Maker fits. Projected over 60 for WW (top 1%) and 104 for YW (top 2%), his bottom-side includes Forefront and Dividend. Beef Maker scanned very well at yearling--113 for IMF and 121 for REA. He possesses an attractive, thick shape, a solid structure and more than enough style. Imagine the possibilities with this one--good-looking cattle with extra muscle, growth and yield.

ANGUS

Simplicity 7AN265

- Super Calving Ease Prospect
- Moderate for Frame and High for Carcass Value

Simplicity is bred to sire moderate-sized, thick-made calves that come easy at birth. Not a big bull, he scanned plenty high for IMF (124 ratio) and reports EPDs that rank him in the top 1% for IMF and top 15% for REA. His sire, Precision 9296, is one of the top bulls for CED in the entire breed. Simplicity is solidly-made with more shape than average and a well-designed structure.
