

Fertility Without Compromise

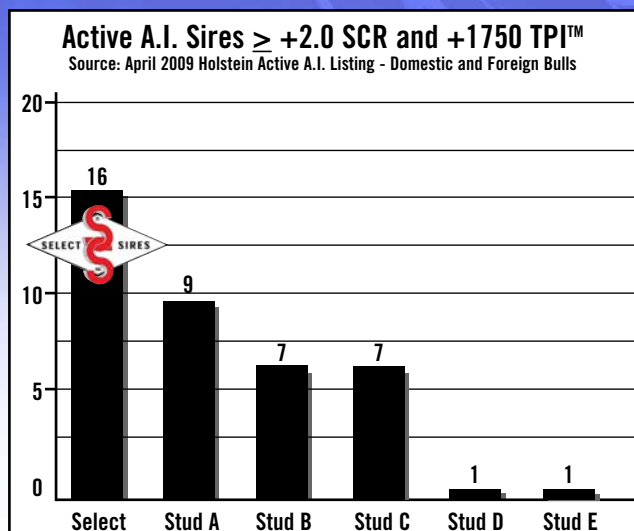

DEMAND IT!

If you're really serious about improving pregnancy rates while still having the option to select the best genetics available in the market today, then stick with the proven leader in the A.I. industry, Select Sires! Some of our competitors claim to put "fertility first" or to be the "number one stud for fertility". The facts say otherwise.

Sure, all studs have some high-fertility sires but no other A.I. source can offer you the choices in high-fertility sires that Select Sires does. We're bigger to serve you better! And, add in Reliability, or any other selection factor for that matter, and Select Sires can't be beat.

Why is Select Sires always on top? When it comes to fertility research, no other source has a research arm that can compare to Select's Program for Fertility Advancement™ containing more than 140 herds and over 150,000 cows!

™TPI is a trademark of Holstein Association USA Inc.,
 Program for Fertility Advancement is a trademark of Select Sires Inc.

At Select Sires, we don't compromise when it comes to semen quality, ever!

You DEMAND high fertility,
 Select Sires delivers it along with breed-leading genetics!
