

# TRI-START JR.

**A direct-fed microbial (DFM) for dairy and beef calves  
Helps stimulate feed intake during periods of change**

## RESEARCH-SUPPORTED FEATURES AND BENEFITS

Each capsule has a guaranteed viable (live) count of **20 billion** colony forming units (CFU) of naturally occurring microorganisms selected specifically for the young animal

- Improves gut health by establishing beneficial microbial populations which crowd out pathogens

**Enhances the environment of the digestive tract which activates the naturally occurring beneficial digestive microbes**

- Reduces occurrence of scours and promotes gastrointestinal microflora improving average daily gain

**Contains live lactic-acid forming bacteria (LABs), live cell yeast and fungal extracts**

- Reestablishes beneficial microbial populations following antibiotic treatment, feed changes and other incidences of environmental stress

**Utilizes state-of-the-art package with low moisture carrier and moisture scavengers**

- Guaranteed LIVE product with 12-month shelf life

**Capsule form (maroon color)**

- Administered easily with any standard calf balling gun

**Research proven and field tested for over 25 years**

- Reassurance of a reputable product

## DIRECTIONS FOR USE

**Administer 1 capsule:**

- Following colostrum feeding
- At weaning
- During digestive upsets
- After antibiotic treatment
- When dehorning, castrating, or during any other period of environmental change or health challenge
- 12 hours after final Tri-Purify capsule

## AVAILABLE PACKAGE SIZE

36 ct. jar  
Case = 8 jars  
Shipper case = 32 jars (4 – 8ct. cases)

## STORAGE

Store in a cool, dry area with lid secure for maximum stability

## Yeast Mannan-Oligosaccharides (MOS) Mode of action

**WithOUT** Tri-Start Jr.

Bacteria with F1 fimbriae attach to the villi and damage cells

**With** Tri-Start Jr.

Yeast Mannan-Oligosaccharides glue pathogens and drag them out of the GI tract.

Crowd out pathogens
